

Attention WMU 338 Antlerless Elk Licence Holders

Drawn Applicants –Hunting Information

The Alberta Fish and Wildlife Division is requesting the cooperation of hunters who have been successful in the Wildlife Management Unit 338 Antlerless Elk Draw.

Haystack depredation problems have created significant hardships for landowners in the northern portion of the Wildlife Management Unit. Therefore, our goal is to focus hunting pressure on antlerless elk in this area. In order to reduce wildlife-landowner conflicts, you are required to hunt under the authority of your WMU 338 Antlerless Elk Licence in the northern portion of WMU 338, only (see map below).

Your cooperation is appreciated. Please remember to ask for permission to access privately owned land – USE RESPECT.
